

Morpheus Photo Warper™

Amazing Picture Warping Software

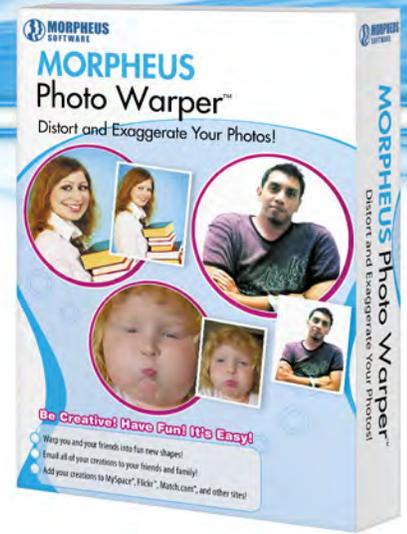

Morpheus Photo Warper is easy-to-use picture distortion software that **warps and exaggerates portions of photos** such as body parts!

Bring Your Pictures to Life!

Have you ever wanted to distort a picture to make someone look completely different? Use Morpheus Photo Warper to **exaggerate physical features of friends, family, celebrities, politicians, pets** - anyone or anything. Amaze your friends and loved ones with hilarious warps and picture distortions you can email to them in seconds!

Get Creative!

- Show your **husband** what he would look like if he lost weight or gained more muscle.
- Make your **friend's** nose grow.
- Exaggerate the ears or eyes in a **baby** photo.
- Transform the image of your favorite **movie star** or **musical artist!**

Features of the Standard Version

Easy to Learn and Use

- **Easy to use wizard** to help you get started creating warps
- **Sample warps** to play with
- **Sharing warps** with friends and family seamlessly with the built-in email feature
- A lightning-fast rendering engine for **previewing** warps by playing them right inside the program
- Rendering warps in a variety of popular formats including **Flash SWF** and **Animated GIF**
- Exporting warp frames in still formats such as **JPEG, PNG, TIFF**, and more
- **Zooming** to any level for precision dot placement as well as warping of large images
- A **timeline** window to quickly see a thumbnail of every frame in your warp

Additional Features of the Professional Version

More Creative Possibilities

The Professional edition lets you create **higher quality warps** and supports **additional output formats**. All Standard features are included with the Professional edition plus additional features such as:

- Line tools, **transparency support**, and key frame options used to create more **advanced warps**
- **AVI output** for use with **3rd party movie software**, including DivX and DV AVIs
- **Customizable interface** including toolbars and window tabs
- **Skinnable windows** with a variety of skins to choose from
